 **COVID-19 Healthcare Supplier Directory**
April 2020

Introduction

Medaco Ltd supply a range of specialist equipment to the NHS, Care Homes and special schools throughout the UK and in response to the COVID-19 crisis, we thought it might be useful for our healthcare customers to be able to access a directory which showcases a range of companies that manufacture and supply products that can support COVID-19 care. To find out more, you can click through to each company website, call or email them.

Medaco is continuing to support our healthcare and care home customers, doing all we can to supply what's needed during the next few months and beyond. For more information on our range of products and how we can help please contact us.

Disclaimer

Please be aware that the availability and prices of products mentioned within this directory may be subject to change. If you require any further information please contact the relevant supplier. We will do all we can to help.

ScreenLok >

A flexible and versatile screening solution that can be rapidly deployed and easily reconfigured. Using fabric-retaining technology, ScreenLok is a fixed fabric screen with a multitude of partitioning uses.

Key Features:

- The screens are hygienic and easy to clean, making them perfect for patient privacy and prevention of cross-infection in healthcare environments. Contaminated fabrics panels can be removed for cleaning or replaced completely
- ScreenLok is perfect for temporary installations and occupies very little storage space in between uses. No special skills are required to assemble or dismantle, making this a solution for every situation
- Screens can be manufactured to bespoke sizes to fit your particular requirements. Just tell us what you need and we'll be happy to design a made-to-measure solution

Thanks to the stable, low-profile foot design, units can be used side-by-side or at right angles with virtually no gaps.

Temporary Privacy Screen >

Key Features:

- Fast set up on site (approx. 2 mins)
- Easily Manoeuvrable once made up
- These are being manufactured at 2200mm length (bed length) and at 2100mm height
- Standard fixed cubicle tracking is also at 2100mm; therefore, this product should work seamlessly with existing cubicle track bed layouts, whilst removing the need for permeant fittings AND providing flexibility
- White PPC finish to all profile, clean with regular detergents, dustcover strip is inherently anti-microbial
- Tool requirements - only 1 x PH2 screwdriver/cordless, 4 x 25mm screws are provided. Approx. set up time per unit is 2 mins.
- FR Disposable Curtain in NHS blue (provided)
- Track compatible with all types of disposable curtains

Room divider and cubicle track systems/disposable cubicle curtains >

Movatrack cubicle rail systems for room divider applications, shower tracks and privacy screens, great for creating additional bed spaces whilst retaining privacy. The system is either silver anodised aluminium or powder coated white and comes complete with quick curtain removal points to allow efficient replacement of curtains.

Can also be used as Intravenous drip systems with a range of telescopic carrier trees available in four sizes; all have simple release adjustment for accurate height control of the five stainless steel hooks.

Pump carriers have a 20mm diameter pole to which syringe and infusion pumps may be clamped; can be used alone for syringe pumps, or positioned alongside a carrier tree for infusion use, and with a load capacity of 30kg will take up to four pumps with ease.

The optional pump carrier with power supply solves the problem of cable management, with an NHS specification supply cable attached to the top of the pump carrier and across to the wall at ceiling height.

Spaceshade canopy systems >

Spaceshade canopies are an aluminium modular canopy system designed for creating covered outdoor spaces for:

- Dining
- Relaxation
- Creating equipment storage space to free up buildings and rooms for beds
- Walkways between buildings
- Decontamination facilities

The modular nature of the product enables fast installation without the need for heavy plant often associated with steel constructions. Spaceshade can also be fitted with our Enclosahade motorised screen to allow outdoor space to be protected from the elements as well as lighting and heating to make it truly versatile and cost effective additional space. Comes in a number of RAL colours to match the surrounding environment.

Ezi Klamp Free Standing Demarcation Barrier >

The Ezi Klamp Demarcation Barrier is the solution to help form queuing lanes to ensure visitors and staff are kept at a safe distance. The barrier is completely free standing and is tested to withstand high windspeeds (105mph), so barrier layouts won't be destroyed by strong gusts.

The barrier is simple to set up and large runs can be installed quickly, but also is able to be quickly reconfigured if site situation changes.

 **Longopac Continuous Liner System >**

Never has hand hygiene and infection control been so important. Touching the top of waste bins and liners can be very unhygienic and a source of cross contamination.

Improve hygiene standards and infection control and reduce risk of contamination with **Longopac Continuous Liners.**

- No hand contact with the waste or top of the bin. All emptying and relining is done beneath the bin and outside of the waste
- Contain viral waste safely and quickly after every procedure
- Reduce plastic usage and carbon footprint with bin liners by up to 70%. Save time and labour emptying bins by up to 38%
- Used in many UK hospitals
